Proclaiming the Reality of God: Scientific and Human Evidence of God's Existence

This PowerPoint and video-based presentation provides amazing scientific evidence—as well as evidence from human nature—demonstrating God's existence. Contrary to the prevailing myth of a conflict between science and faith, attendees will be excited to learn "the rest of the story" regarding scientific evidence of God's existence, mostly presented on video by scientists themselves. This information will strengthen our faith and be valuable for sharing with family and friends who may doubt the existence of God.

Which is True: Creation, Evolution, or Both?

This apologetics presentation explores key Church teachings on the biggest challenge to faith experienced by many people today, especially in college: Is evolution compatible with faith in God? Or does evolution make it possible to be an "intellectually fulfilled atheist" (to quote Oxford Professor Richard Dawkins)? This multimedia presentation will provide valuable information for discussion with those who have questions about God's role in the development of life on earth, including how an intelligent cause is a valid explanation for the genetic information in DNA.
